

Low Voltage & Snowmakers Seminars

May 1-2, 2025

Loon Mountain Resort

Sponsorship Opportunities

Ski NH's Annual Low Voltage Seminar delivers top-notch training and development for lift mechanics. Participants dive deep into the essential aspects of maintaining and repairing chairlifts with a focus on lift electrical and electronic components. Training is hands-on at ski area lifts and in control rooms with some limited classroom time where required.

Whether staff are new to lift operations or are seasoned mechanics, our seminar has educational opportunities for all. **New this year is the development of tracks that will have Level 1, Level 2 and Level 3 designations to correlate with NSAA level skills!**

A Snowmakers Seminar will also be held concurrently at Loon and provide a comprehensive curriculum designed to equip participants with important snowmaking skills. Certificates will be awarded all participants.

Businesses interested in supporting these seminars are invited to become sponsors at one of the following levels. **Sponsors of the Ski NH Annual Conference & Trade Show save 50% of sponsorship costs listed below.**
